What's new in WS_FTP Professional 12.8

The following new features and improvements were added to WS_FTP Professional 12.8.

Support for additional SSH key exchange (KEX) algorithms

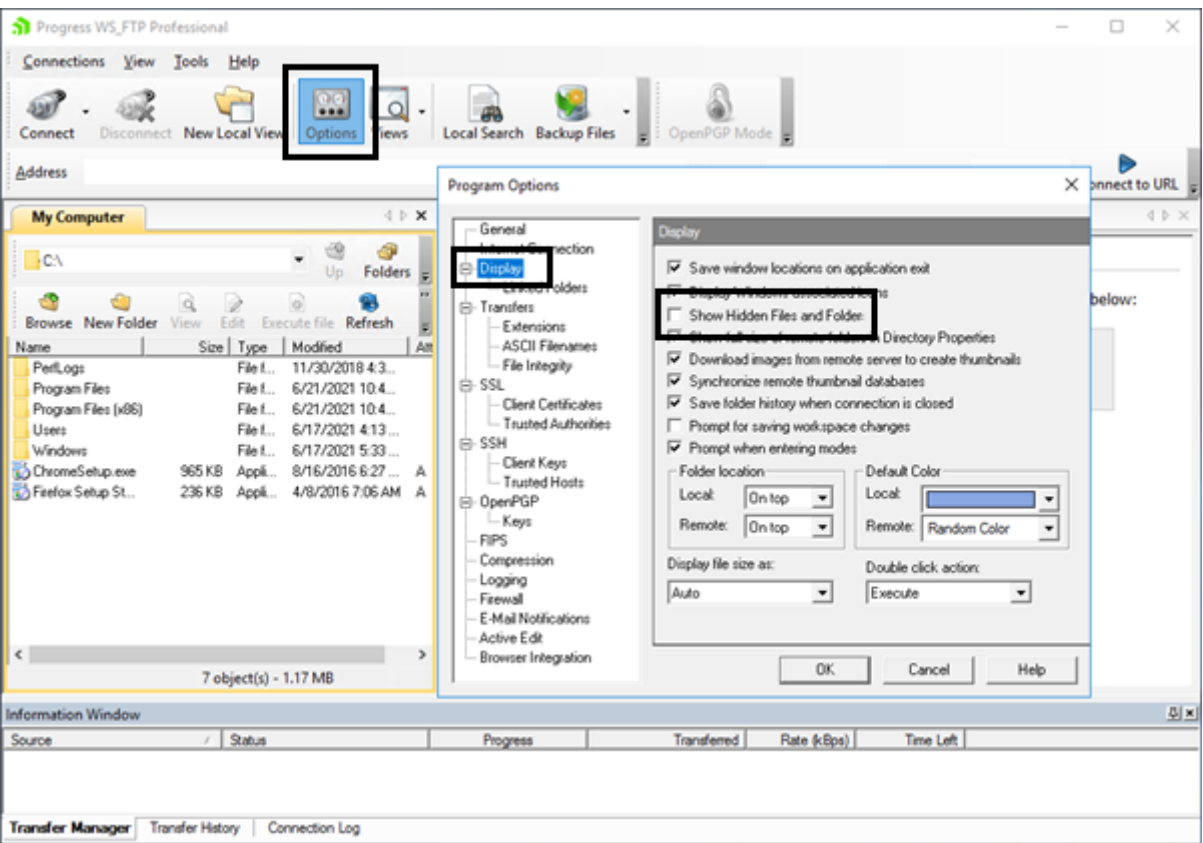

WS_FTP Professional supports the following ECDH SSH KEX algorithms:

- ECDH-SHA2-NISTP256
- ECDH-SHA2-NISTP384
- ECDH-SHA2-NISTP521

For more information, see [SSH Algorithms](#).

Hidden files and folders option

Files and folders that are marked as hidden are only visible if the WS_FTP Professional user explicitly requests that they are visible via the Display option.

Open source third-party component documentation

Details of the open source third-party components incorporated in WS_FTP Professional are available from the Notices button on the About Progress WS_FTP Professional screen (**Help > About**).
