IBM®

IBM Notes and Domino 9.0 Social Edition puts you on a solid path to becoming a social business

IBM Europe, Middle East, and Africa Software Announcement ZP13-0108

March 12, 2013

📄 ENUSZP13-0108.PDF

At a glance

IBM® Notes® and Domino® 9.0 Social Edition delivers significant new capabilities to help you create a more effective workforce. It deeply integrates social and business information to engage expertise, share and gather information, and improve decisions:

- Increases productivity by eliminating the need to switch to other applications to take action.
- Delivers modern, rich user experience through installed client, browser, or a full range of mobile or tablet devices that already includes iOS and Android, and newly added support for Microsoft™ Windows™ Phone 8 and BlackBerry 10.
- Guides your workforce down the path of becoming a social business and delivers social capabilities to exactly where an end user chooses to work.
- Enables access to your business applications right from the web with the IBM Notes Browser plug-in.
- Integrates, develops, and deploys business applications easier and faster than ever with Domino support for SAML and Oauth.
- Uses existing application investments to easily extend to new levels of integration.
- Supports "bring your own device" with the most comprehensive enterprise mobile collaboration in the market, now supporting Apple iOS, Android, and Symbian, and adding Windows Phone 7.5 and 7.8; Windows Phone 8; Windows 8 Tablet RT and Pro; BlackBerry 10; and IBM i Server.
- Delivers enhanced support for Notes Traveler Companion and Notes Traveler ToDo mobile applications.

✦ Back to top

Overview

IBM Notes and Domino brings business applications and social collaboration together. It delivers social capabilities whenever and wherever users are working at the moment, helping to accelerate business operations, improve decision making, and enhance productivity.

This complete solution helps end users work efficiently from virtually anywhere, at any time, with the people and information they need right at their fingertips.

IBM Notes and Domino software puts you on a solid path to becoming a social business. IBM Notes and Domino 9.0 Social Edition offers the following features and benefits:

- A contemporary, simple user interface for in-context social collaboration with activity streams enables you to take action quickly on content and events. Embedded experiences help you to gain access to business-critical actions from other applications. This brings collaboration in context and results in tighter integration across iNotes® , Connections, Notes , application development (XPages), and third-party products and services.
- IBM Notes Browser plug-in enables rapid delivery of IBM Notes applications to the web.
- Software incorporates a social application container, based on the OpenSocial standard for development of a reusable set of "gadgets" from both IBM and third parties.
- Industry-leading enterprise mobile collaboration with Traveler updates includes support for Microsoft Windows Phone 7.5, 7.8, and Windows Phone 8; Windows 8 Tablet RT and Pro; BlackBerry 10; and IBM i Server.
- Application development and integration is easier and faster than ever with Domino support for Security Assertion Markup Language (SAML) and Open Standard for Authorization (Oauth). XWork Server has been updated with broader and more flexible license terms; and Domino Designer and XPages include improvements for better Notes , web, and mobile applications.
- Easy and confident deployment; you can take a giant step forward on becoming a more efficient and socially driven business, or evolve more conservatively with optional deployment scenarios.
- Software integrates with IBM Connections 4 through entitlement to the Files and Profiles applications and access through all clients, browsers, and mobile devices.

Description

IBM Notes and Domino software brings social collaboration and business applications together in a single, easy-to-use environment. With just-in-time access to applications and email across a wide range of client devices, IBM Notes and Domino software enables users to seamlessly tap into the knowledge of people both inside and outside of the company.

Enhancements: IBM Notes

- Click on URLs in edit mode
- Categorize inbox by date (today, yesterday, last week)
- Single-click access to mail, calendar, contacts, and more
- Rolling calendar view (additional weeks)
- Weekly planner view

- Mac Cocoa support

IBM iNotes

- Tighter portfolio integration
- Simplified calendar entry
- Improved scheduler
- OpenSocial gadgets integration
- Sidebar extensibility
- Live Text
- Relocate folders
- Secure attachment viewing using IBM Docs

IBM Notes Browser plug-in

- Designed to extend reach of applications previously available only to Notes users.
- Offers a powerful complement to existing XPages capabilities.
- Enables applications to run in a browser with no modification.
- Delivers lightweight installation, similar to other plug-ins in size, deployment, and configuration.
- Offers free entitlement to clients who have active entitlements to IBM Domino Collaboration Express® and IBM Domino Enterprise Client access license.
- Includes Domino Enterprise Client access license. Domino Utility Server and Domino Utility Server Express customers with active entitlements can receive access to the Notes Browser Plug-in with an entitlement to the Domino Enterprise Client access license.

IBM Notes Domino V9.0 Social Edition

Enhancements are designed to:

- Reduce total cost of ownership.
- Enhance security
- Offer infrastructure for social business
- Increase platform support

Enhancements include the following:

Reduce total cost of ownership with:

- Database Management Tool
- NetWare Directory Services (NSD) monitor for UNIX™
- Quality of Service probe
- Simplified Notes ID management via SAML support

Enhanced security, including the following:

- Secure Hash Algorithm 2 (SHA) support for encryption
- Transport Layer Security (TLS) delivered via IBM
- OAUTH credential store to support Embedded Experiences

Platform expansion offers continued focus on virtualization and 64-bit Windows 2012 platform support

Infrastructure for Social Business includes Single Sign-On (SSO) via SAML support for both web and Notes access.

IBM Domino Designer V9.0 Social Edition

Application development improvements in Domino 9.0 Social Edition include the following:

- Increased developer productivity
- Enhanced capabilities for building web applications
- Improved programmability by delivering new APIs
- Enhanced ability to build new and mobilize existing applications
- Support for integration of social services into collaborative applications

Enhancements:

- Server-side JavaScript debugger
- XPages source editor Content Assist
- New home page, welcome experience
- New XSP properties editor

- Xpage source editor hyperlink navigation with Ctrl key
- XSP source editor hover help
- XPages run time
- Integration of Notes and Domino 8.5.3 Upgrade Pack 1
- Dojo 1.7.2 with improved support for mobile web applications
- CKEditor 3.6.3 with support for iOS 5
- XPages in Notes client (XpiNC) performance enhancements

IBM Notes Traveler

Notes Traveler V9.0 Social Edition adds To Do sync support (previously delivered in Notes Traveler V8.5.3 Upgrade Pack 2) for Android and Apple iOS devices, and Windows Phone device support, and updated operating system support to enable the most comprehensive list of supported mobile devices and operating systems to support "bring your own device" programs.

Enhancements include the following:

To Do sync support for Notes Traveler for Android and Apple iOS:

- Using the new Notes Traveler To Do application on an Android or Apple iOS device, mobile users can review upcoming To Do's, complete To Do's or remove them entirely, create new To Do's, or organize To Do's into lists and sync attachments.
- Enhanced support for Notes Traveler ToDo and IBM Notes Traveler Companion applications enables standard Problem Management Record (PMR) type problem reporting.

Updated support for the following devices:

- Windows Phone 7.5, Windows Phone 7.8, and Windows Phone 8
- Windows 8 Tablets RT and Pro
- BlackBerry 10 devices connecting to Traveler

For more information on IBM Notes Traveler 9.0 support for Blackberry 10 and Windows 8 Tablets, you can view the IBM Notes Traveler 9.0 documentation at

> http://www.lotus.com/ldd/dominowiki.nsf

Updated Notes Traveler server operating system support to expand choice and flexibility of installation and deployment options:

Notes Traveler now supports these additional operating system platforms:

- IBM i
- Windows Server 2012
- Red Hat Linux™ 6 64-bit mode
- SUSE Linux 11 64-bit mode

Support for Red Hat 5 and SUSE 10 has been removed as those operating system levels are not supported by the Domino 9 server.

Support for Red Hat Linux 5 and SUSE Linux 10 has been removed. These operating system levels are not supported by the Domino 9 server.

IBM Enterprise Integrator for Domino V9.0

IBM Enterprise Integrator for Domino is a server-based data access tool that helps enable enterprise-strength data transfer and synchronization between IBM Domino and supported external systems. With point-and-click ease, you can also enable real-time access from IBM Domino applications to data sources such as IBM DB2 Universal Database™ , Oracle, SAP, Microsoft SQL Server, Sybase, and more.

Enhancements include the following:

- Support for Microsoft SQL Server 2012
- Upgraded ODBC drivers to IBM DataDirect ODBC Drivers 7.0 for Domino

IBM Notes and Domino licensing and entitlement updates

- All clients with an active entitlement to IBM Domino Collaboration Express now receive access to IBM Domino Designer V9.0.
- IBM Tivoli® Directory Integrator and IBM Mobile Connect entitlements have now been updated to the latest release.

- IBM WebSphere® Edge Components can now be used with the included entitlement to WebSphere Application Server Network Deployment.
- IBM Domino Collaboration Express and IBM Domino Messaging Express entitlements can be used only to access an Domino Express environment.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM Web site

    http://www.ibm.com/able/product_accessibility/index.html

Technical information

Specified operating environment

Hardware requirements

For the most up-to-date information regarding hardware and software requirements, visit

http://www-01.ibm.com/software/support/
http://www-947.ibm.com/support/entry/portal/Overview/Software/Lotus/Lotus_Notes

Software requirements

Refer to the Hardware requirements section.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM , such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express . Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

IBM Notes and Domino V9.0 will be distributed via a media package and electronic software distribution (ESD).

- IBM Notes and or Domino product DVDs or electronic image files
- Softcopy product documentation, including README files, which is included on the product DVDs or electronic image files

The License Information form numbers are:

- L-GHUS-86PQP8 for IBM Domino Server
- L-GHUS-8BPSG5 for IBM Enterprise Integrator
- L-GHUS-86PQVM for Domino Enterprise Client Access License
- L-GHUS-86PQVM for Domino Messaging Client Access License
- L-GHUS-86PQVM and L-GHUS-86PQP8 for Domino Messaging, Collaboration Express

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Global Technology Services

Contact your IBM representative for the list of selected services available in your country, either as standard or customized offerings for the efficient installation, implementation, or integration of this product.

Charge metric definitions

Authorized User

Authorized User is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. The program may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the program at one time. Licensee must obtain separate, dedicated entitlements for each Authorized User accessing the

program in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User an may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Note: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Processor Value Unit (PVU)

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology as defined within the PVU table by processor value, brand, type and model number, and the number of processors made available to the program at

http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (refer to web page below). If using full capacity licensing, licensee must obtain PVU entitlements sufficient to cover all activated processor cores[1] in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using virtualization capacity licensing, licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

[1] An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes :

- Some programs may require licenses for the program and what is being managed. In that case, the following applies: In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis only. In that case, the following applies. Instead of the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

Cross-platform product for use on System z IFL engines and/or zEnterprise BladeCenter Extension

Order the part numbers that follow when the product is intended to run on the zEnterprise® BladeCenter® Extension and/or Linux operating system on System z IFL engines. If the product is not intended to run in these environments, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form numbers

```
Program name                         Program      Form number
                                     number

```

The program's License Information will be available for review on the IBM Software License Agreement website

> http://www.ibm.com/software/sla/sladb.nsf

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

> http://www.ibm.com/support/handbook

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with

access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM , including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

- For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

- For clarification, note that for programs acquired under any of IBM's On/Off CoD software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

> http://www.ibm.com/software/passportadvantage

This product is only available via Passport Advantage . It is not available as shrinkwrap.

Usage restriction

Yes

For additional information refer to the License Information Document that is available on the IBM Software License Agreement Web site

> http://www.ibm.com/software/sla/sladb.nsf

Software Subscription and Support applies

Yes. Software Subscription and Support is included with licenses purchased through Passport Advantage and Passport Advantage Express . Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

> http://www.ibm.com/support/handbook

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

> http://www.ibm.com/software/passportadvantage

System i Software Maintenance applies

No

Educational allowance available

Education allowance does not apply.

Education software allowance does not apply.

Special education prices are available for qualified customers through Passport Advantage .

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

On/Off Capacity on Demand (CoD)

To be eligible for On/Off CoD pricing, customers must be enabled for temporary capacity on the corresponding hardware, and the required contract - Z125-6907, Amendment for iSeries® and pSeries® Temporary Capacity On Demand - Software - must be signed prior to use.

IBM Electronic Services

Electronic Service Agent™ and the IBM Electronic Support web portal are dedicated to providing fast, exceptional support to IBM Systems customers. The IBM Electronic Service Agent tool is a no-additional-charge tool that proactively monitors and reports hardware events, such as system errors, performance issues, and inventory. The Electronic Service Agent tool can help you stay focused on your company's strategic business initiatives, save time, and spend less effort managing day-to-day IT maintenance issues. Servers enabled with this tool can be monitored remotely around the clock by IBM Support all at no additional cost to you.

Now integrated into the base operating system of AIX 5.3, AIX 6.1, and AIX 7.1, Electronic Service Agent is designed to automatically and electronically report system failures and utilization issues to IBM , which can result in faster problem resolution and increased availability. System configuration and inventory information collected by the Electronic Service Agent tool also can be viewed on the secure Electronic Support web portal, and used to improve problem determination and resolution by you and the IBM support team. To access the tool main menu, simply type "smitty esa_main", and select "Configure Electronic Service Agent ." In addition, ESA now includes a powerful Web user interface, giving the administrator easy access to status, tool settings, problem information, and filters. For more information and documentation on how to configure and use Electronic Service Agent , refer to

> http://www.ibm.com/support/electronic

The IBM Electronic Support portal is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. This portal enables you to gain easier access to IBM resources for assistance in resolving technical problems. The My Systems and Premium Search functions make it even easier for Electronic Service Agent tool-enabled customers to track system inventory and find pertinent fixes.

Benefits

Increased uptime The Electronic Service Agent tool is designed to enhance the Warranty or Maintenance Agreement by providing faster hardware error reporting and uploading system information to IBM Support. This can translate to less wasted time monitoring the "symptoms," diagnosing the error, and manually calling IBM Support to open a problem record. Its 24 x 7 monitoring and reporting mean no more dependence on human intervention or off-hours customer personnel when errors are encountered in the middle of the night.

Security

The Electronic Service Agent tool is designed to be secure in monitoring, reporting, and storing the data at IBM . The Electronic Service Agent tool securely transmits either via the Internet (HTTPS or VPN) or modem, and can be configured to communicate securely through gateways to provide customers a single point of exit from their site. Communication is one way. Activating Electronic Service Agent does not enable IBM to call into a customer's system. System inventory information is stored in a secure database, which is protected behind IBM firewalls. It is viewable only by the customer and IBM . The customer's business applications or business data is never transmitted to IBM .

More accurate reporting

Since system information and error logs are automatically uploaded to the IBM Support center in conjunction with the service request, customers are not required to find and send system information, decreasing the risk of misreported or misdiagnosed errors. Once inside IBM , problem error data is run through a data knowledge management system and knowledge articles are appended to the problem record.

Customized support

Using the IBM ID entered during activation, customers can view system and support information in the "My Systems" and "Premium Search" sections of the Electronic Support Web site at

http://www.ibm.com/support/electronic

My Systems provides valuable reports of installed hardware and software using information collected from the systems by Electronic Service Agent . Reports are available for any system associated with the customer's IBM ID. Premium Search combines the function of search and the value of Electronic Service Agent information, providing advanced search of the technical support knowledgebase. Using Premium Search and the Electronic Service Agent information that has been collected from your system, customers are able to see search results that apply specifically to their systems.

For more information on how to utilize the power of IBM Electronic Services, contact your IBM Systems Services Representative, or visit

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

http://www.ibm.com/financing

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financial benefit

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.
